

Geographic Information Systems (GIS) Teleconference

Date of the conference: March 26th, 2013

Conference overview

- The regional teleconference was open to local, state and federal GIS professionals to call in and listen to eight unique regional projects that had been conducted within the South Western Region. These projects are made up of various subjects that can be applied across a wide range of issues and the solutions. Many of the solutions presented utilized either existing tools found at many agencies or highlighted collaborations which both areas resulted in reduced cost and improved data collection techniques.

Presentations

1. Mojave Desert Ecosystem Program (MDEP) – Dustin Wiersma -Brief overview of the MDEP, available GIS services, and future projects.
2. USGS, TX – Daniel Pearson -Using HTML5 for Field Data Collection of Small River Impoundments in Texas.
3. Southern Nevada Agency Partnership (SNAP) – Evan MacDougall & Kerry Holcomb- Interagency Restoration Database (IRD), Shared Server Approach
4. Coachella Valley Association of Governments (CVAG) – Nick Peihl -Coachella Valley Land Acquisition Database – Integrating GIS and Document Management
5. CA Department of Fish and Game – Rosalie Yacoub -2013 California Desert Vegetation Map in Support of the Desert Renewable Energy Conservation Plan
6. USGS, CA – Drew Decker -The National Map Resources for the Mojave Desert Region
7. Riverside County Habitat Conservation Agency (RCHCA) – Brian Shomo -GIS for SKR HCP Coordination and Management
8. University of Redlands/Ft. Irwin – Damilola Eyelade -Net Zero Water Study for Fort Irwin, California-
