OHV Grant Application

This project will educate OHV users and general recreationalist how to enjoy the desert while having a lower impact on the tortoise, its habitat, and the desert environment. How OHV vehicles are used and what riders do while in the desert has specific, quantifiable impacts on the environment. Obeying the laws and practicing conservation insures a healthy desert ecosystem that can support future generations of desert OHV enthusiasts and viable populations of desert tortoises.

The Program provides general information on the tortoise and why we as a generation should care about the tortoise and the tortoise's survival. It also teaches how individual actions can impact the tortoise and negatively affect its survival. The project has a set of messages that include why it is important to:

- Stay on the designated trail or within a designated OHV area;
- Pack out all litter;
- Keep hands off wildlife;
- Respect the land; and
- Enjoy OHV recreation safely.

BUILDERS GUIDE

*one desert
one tortoise
one chance*

Builders Guide went to GPO, we expect shipment in a few weeks. We are also distributing PDF file.
